GoGeeks Moves into a New Expanded Facility on 15 Benton Drive East Longmeadow

GoGeeks owner and president Stan Prager shown here during the set-up and installation of equipment in the new larger facility at 15 Benton Drive in East Longmeadow. The new facility contains not only an expanded service workspace, but a separate showroom for Paths of Creation Custom PC Design & Manufacturing. -- Let GoGeeks Rescue You!

On April 1st, GoGeeks moved into a new larger facility on the other side of the building from their original compact offices on 15 Benton Drive. The small offices GoGeeks occupied in 2008 had grown too tiny for the operation. When a larger and better designed space became available on the other side of the building, owner Stan Prager leaped at the opportunity to expand the business and the staff. In addition to a much larger "shop" with ample stations to accommodate more than a dozen computers under repair at the same time, the new facility contains separate adjacent dedicated spaces for custom PC manufacturing and an actual showroom to display floor models of the Paths of Creation Custom PC lineup.

Housecalls Are Our Business

We love the new facility and you can feel free to drop off your laptop or tower to us, but we remain a housecall business. In fact our motto is "Housecalls are our Business." Housecalls are always available at no additional charge in our local service area.

Let GoGeeks Rescue You!

New Vaccines for Malware

Forget everything we've ever told you about protecting your computer against malware, the umbrella term for the viruses and spyware that creep into your computers and knock them off-line and out of commission. We now offer a brand new super-powerful security package -- including anti-virus, anti-spyware, and firewall -- which is better than anything else currently out there and consumes far less system resources, which means much less of an impact on overall performance than the traditional anti-virus brands. So your computer will be safe and run much faster than was once possible with security software installed. The new security package is only \$89 and includes the essential update subscription for one full year. Switch to the new security package today!

Safeguard Your Kids on the Web!

Ask us about our parental control package that easily customizes internet accessibility for each member of the family. It not only keeps your kids off of questionable sites, but also offers you the ability to control the days and times your children can access the web -- so study hours and your peace of mind are always under your control, regardless of where the computer is located in your home.

Directions to GoGeeks

We've been told we're not easy to find! It's true: the street numbers run haphazard on Benton Drive, we are located on the side of a large office building with lots of other businesses, and our signage is still incomplete. This may help you find us: Dwight Road in Longmeadow becomes Benton Drive after you cross Williams St. Follow Benton towards Denslow Rd., look for Industrial Ave on your left & Coyote Storage on your right – we are the second building on your right after Coyote Storage. Pull in the first driveway – there's a sign for TCS (Trans Courier Systems) – and we are on the side of the building, the last door on the left. Call first in case we're all out on rescue missions: **413/525-8897**
